

TRIX-8

Record temperature and humidity at little cost !
Reliable, uncomplicated, credit card sized !
Unbeaten value for money !

LogTag products are specifically designed to meet the growing demand for cost effective data logging solutions. Combining state of the art technology with the latest design allows LogTag data loggers to be fit for today's demands.

LogTag data loggers are a perfect match for all applications where temperature and humidity must be recorded reliably and independently over any time frame. Typical applications include transport/warehousing (cold chain) and room monitoring in the industry of foodstuffs, hospitals, pharmacy, bio-tech and many more. The temperature logger TRIX-8 is accompanied by a comprehensive and intuitive software package for analysis, operating in 16 languages.

The temperature measurement range of -40°C to $+85^{\circ}\text{C}$ covers a variety of applications with an accuracy better than $\pm 0.5^{\circ}\text{C}$. Battery life of 2 to 3 years is exemplary in this price segment.

In addition to the temperature data loggers, combined temperature/humidity models also exist as well as loggers with remote sensor probes. Low-temperature loggers down to -80°C are also available.

The LogTag data logging system is exceptional given its extremely good cost/benefit

Credit card sized data logger with unique external temperature sensor arrangement
